Assignment1

Class: BSSE   Course code: SPM494
Subject: SPM   Credit hours 3
Sec:A   Instructor: Hina Javed
Bloom Taxonomy Level: applying   Max Marks: 30

Question 1:

A software company is planning to develop a new hospital management system. As a Project Manager, you are required to develop the Project Charter. Using your understanding of *Project Integration Management*, describe the key components you would include in the Project Charter and explain how it will support the initiation and authorization of the project.

Question 2:

You are managing a project in an organization where different departments follow distinct cultural and communication styles. Explain how Organizational Culture, Communication Channels, and Enterprise Environmental Factors (EEFs) will influence your project planning and execution. Provide examples of how you would adapt your management approach to ensure effective collaboration and communication among diverse teams.

Question 3:

A software project has entered the Monitoring and Controlling Process Group phase. Midway through development, the client requests several changes. Using your knowledge of Project Management Processes, explain how you would apply change control mechanisms to handle these requests without affecting the project's baseline (scope, time, and cost).
Demonstrate how these steps help ensure project integration and contro
